

TACTYS®: SLIM Range

TACTYS provides innovations to meet the requirements of environments where hygiene* and infection control are essential. The TACTYS® SLIM Range offers all the advantages of the TACTYS® CLASSIC keyboard but in an ultra-thin 15mm version offering a simple, elegant design. The SLIM fits discreetly on any work top and can also be easily operated from a trolley.

SLIM 711 - Ultra-thin

NEW

** The mechanical keyboard, after the telephone, harbours the most germs (Dr.Charles Gerba, Microbiologist, University of Arizona), because of their design, they can't be easily cleaned nor are they waterproof. Dirt and germs lodge on and between the keys and cannot be effectively removed in spite of various cleaning methods used i.e. sprays, wipes etc...*

The SLIM 711 touch-sensitive keyboard: Asepsis in Design

Touch-sensitive, ultra-thin, tempered glass keyboard with numeric keypad, the SLIM711 combines hygiene, design and ergonomics. Thanks to its capacitive effect, pressure free technology (Zero Newtons), data entry is smooth and fast. Its flat tempered-glass surface can be disinfected with a single wipe and its ultra-thin design means it can be virtually used anywhere.

10 advantages of the SLIM 711

- **Flat glass surface:** No bumps or difficult to access areas make cleaning easy. No crevices to harbour dirt or germs.
- **Easy to clean:** with one simple wipe, saving time and ensuring a germ-free work surface.
- **Resistant** to all chemical agents used in hospitals or clean rooms. Tempered glass is tough, durable and impermeable to fluids. Does not degrade or discolour as with silicone or plastic keys.
- **All surfaces are waterproof** to IP65: it can withstand liquid spillages, damp atmospheres, jet washing, disinfectant sprays etc...
- **Can be used with gloves:** All types of gloves (latex and non-latex), even double thickness ones.
- **Plug and play:** Simply connect and it works immediately. It has an integral numeric keypad and all the normal keyboard shortcuts.
- **Ergonomic:** Adjustable sensitivity. Its new control system allows it to adapt to each user.
- **Locking function:** It has a locking function for instant cleaning
- **Adjustable audible beep:** It has an adjustable audible key stroke beep that can be set on or off as required.
- **Compact:** As it is so small, it can be used anywhere; on a work station, operator's console, trolley, arm rest etc.
- **Elegant:** Its refined design fits in anywhere: theatres, ITU, dental practices, laboratories and food processing environment etc..

An elegant, effective tool in the fight against hand-borne infections.

The TACTYS® SLIM711 incorporates innovation and design in hygiene. At a work station, fitted to an arm, or on a trolley it can be used anywhere, in theatres, at clinical work stations, in treatment rooms as well as in emergencies.

TACTYS®: The touch-sensitive technology for infection control

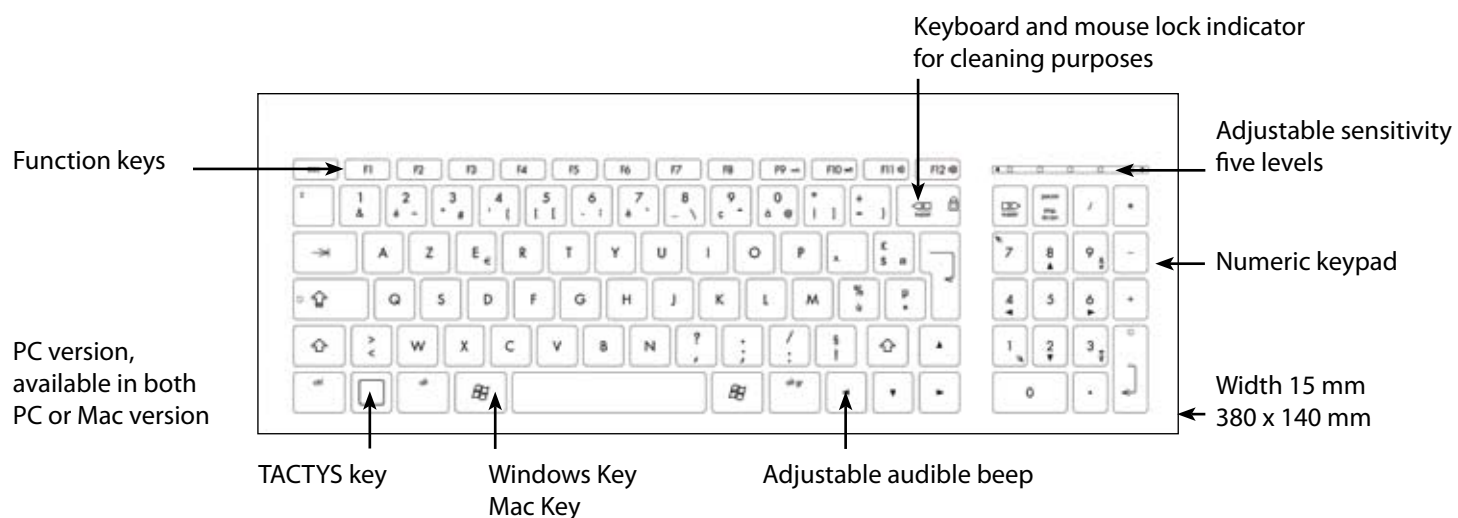

To measure the cleaning effectiveness, the TACTYS® keyboard was compared to a silicone keyboard.

■ Pasteur Laboratory in Lille, Nov. 2009.

Post contamination the number of bacteria were reduced by 4 decimal points compared with 2 for the silicone keyboard (see diagram)

Contamination by *Pseudomonas aeruginosa* by depositing and drying of 106 micro-organisms per cm². Count of PCA nutrient agars 30 minutes before and after cleaning the surface with anti-bacterial disinfectant wipes (EN1040 and EN1276).

Spécifications :

- Zero Newton, touch-sensitive keyboard
- Flat data entry surface. 4mm tempered glass
- Screen printing on the back of glass preventing discolouring
- All surfaces guaranteed waterproof to IP 65
- Works with gloves, even lined ones
- Resistant to all disinfectants
- Plug and play (instant connection)
- Compatible with Windows and Linux
- Available with PS2 connection
- Windows keys
- Keyboard locking function for cleaning
- Adjustable audible beep
- Complies with European standards: 100 % ROHS
- EMC certified by the IRSEEM laboratory
- Polycarbonate base cover with access panel
- Dimensions: 407mm x 175mm x 15mm
- CE Marked
- 3-year factory warranty

Available in AZERTY, QWERTY UK, QWERTY SP, QWERTY DK, QWERTZ DE, QWERTZ CH

Made in France. All our keyboards are guaranteed for 3 years for return to the workshop
