

T 707 Series : *innovation for hygiene*

■ T 707 touch-sensitive keyboard in tempered glass with key pad

The T 707 puts innovation and design at the service of hygiene. Thanks to its contact-free capacitive effect technology (0 Newton), the lightest touch is enough to activate the keys. It can be disinfected with a simple gesture, and is resistant to all chemicals. It is very comfortable, can be used with gloves, is protected against sprays of liquid, has a locking feature for cleaning, and is an indispensable element for the organization of a clean and effective IT work station.

■ TH 707 touch-sensitive keyboard in tempered glass with key pad and hub

The TH 707 has the same specifications as the T 707. It includes in addition a mini-USB port on the back of the keyboard with a waterproof cap that allows you to use your keyboard as a peripheral: hook up a handheld scanner, a barcode reader, or RFID tag reader to handle your tracking needs. These direct connections allow you to use the central unit remotely (in the treatment room or operating room). Freed from its mouse and central unit, your work station is even cleaner and more operational.

■ TH 707 RFID – built-in BlueLoc* touch-sensitive keyboard in tempered glass with key pad and hub

The TH 707 RFID adds BlueLoc operation. With BlueLoc*, you preserve the confidentiality of your work station. It allows secured access by detecting the presence of the badge of the user, who is able to unlock the keyboard hands free. And when the user moves away, the section is secured with no action needed by the user. The BlueLoc* solution allows for automatic user identification in the professional applications used.

The TH 707 RFID is particularly appropriate to hospital environments and in all cases where confidentiality is required.

* BlueLoc is a product of BlueLinea.

Specifications :

- "0 Newton" touch-sensitive keyboard: no pressure needed, the lightest touch is enough
- Entry surface in perfectly smooth 6mm-thick tempered glass
- Works with gloves
- Resistant to all disinfectants
- IP 65 waterproofing guaranteed
- Plug and play (instant connection)
- Connection by USB cable with cable gland
- Keyboard locking for cleaning
- Adjustable audio feedback
- Windows key
- Compatible with Windows and Linux
- Possibility of remote use of the central unit (>75m) with Ethernet (KVM recommended)
- Complies with European standards: 100% ROHS, CEM certification by ESIGELEC
- Cover in polycarbonate with access hatch
- Dimensions 419mm x 188mm x 40mm

All our keyboards benefit from a three-year off-site warranty
