

## Specifications

ISIA	
EQUIPMENT	
Waterproof	IP65-waterproof front & rear side Without fan, no inlets
Connections	IP68-waterproof 1 RJ45, 2USB, 1miniUSB
Power supply	24V DC/2A
Screen	LCD 17": 1280 x RGB x 1024 resolution
Temperature	Usage 0 to 40°C Storage -20°C to - 60°C
Dimensions	455 x 340 x 90 mm
Weight	7,4 kg
Hood	Anti-shock polystyrene
Optional	PC version with hard disk
SOFTWARE	
Software solutions	Impact Technologies
OS	Windows CE 5.0 or supp or Windows XP Embedded or LINUX (kernel 2.6)
Bios	BIOS PXE
Navigator	Internet Explorer 7 (for Windows) Mozilla 1.7 (forLinux)
OS serveur compatibility	Windows 2000/2008 terminal Services Windows XP Citrix Metaframe Nfuse
Other features	Choice of RDP or ICA protocol Integrated VPN, PPPoE clients SNMP support
Admin software	Itium Admin Services (IAS), centralised administration software
Processor	VIA 1 Ghz highly integrated
RAM	Maximum DDR of up to 1 GB, DDR2 256
Flash Disk	32 Mo (maximum of up to 1 GB)
Network	Ethernet Gigabit Port: RJ45 connector WiFi 802.11b/g USB adaptor optional

ENERGY PACK	
Technology	(2) 12 V Gel batteries
Input voltage range	230V +/-10% - 50 Hz
Charge specifications	Charge Voltage "absorption": 28.8 V Charge Voltage "float": 28 V Charge Voltage "storage": 26.4 V Charge current : 5A
Charge characteristics	4 steps adaptative / temperature controlled Charge time 6/7 h
Indicator	Charge gauge with 4 different levels. 90 min. warning light
Usage time	12 hours autonomy

CART	
Structure	Aluminium – Chrome steel handle Anti-shock polystyrene shelf 125 mm diam. polyamide casters with front brakes
Total height	1400 mm
Tray top height	1000 mm
Keyboard height	950 mm
Dimensions	width 680 x depth 550
Weight	40 kg with the 2 batteries

KEYBOARD	
Technology	Touch-sensitive 6 mm tempered glass 0 Newtons without pressure: by capacity effect Works with gloves IP65-waterproof
Features	Numeric keypad Integrated touchpad Lockable for cleaning Beep sound is adjustable
Connection	PS2

SOFTWARE SERVICE	
Purchase of the software package includes	Flash card equipped with the appropriate OS, Memory card with appropriate capacity. Unlimited French and English hotline support.
This software service is handled by our partner IMPACT Technologies.	

GUARANTEE	
ISIA	3 years factory return
Touch keypad	3 years standard exchange
VOYAGER	5 years standard exchange for removable parts (casters, shelf, handle, etc...) 5 years on-site or factory return for other repairs 3 years for the energy pack (excl. batteries)
Norms	CE - RoHS certification
The guarantee is valid under regular usage conditions and after the after-sale department has been contacted. This guarantee doesn't cover damages that arise from abnormal usage, broken glass, or the replacement of batteries.	

# VOYAGER

*Hospital hygiene requirements are a key priority*

*Their IT systems require the most advanced technologies*

*Experts in data entry, we are committed to serving hospitals' needs*

*We've therefore designed VOYAGER, the new generation's mobile workstation.*

The IT cart  
designed for  
hygiene

Waterproof and fully equipped, VOYAGER simplifies the mobility and the asepsis of the IT station

- ISIA thin client/terminal screen
- WiFi network connection
- 12-hour energy pack
- Smooth TACTYS keyboard
- Integrated touch pad

TACTYS®

# VOYAGER : *the autonomous and clean mobile workstation*

## Fully equipped, compact, autonomous

*Ready for use, VOYAGER is equipped with a complete and innovative IT and electronics system.*

More than a cart : it's your robot-Voyager

**Cart design: 3-P Company**

### Integrated

ISIA features a 17" screen, a thin client,, a WiFi connection and a power supply card that optimises its autonomy. Powered with a VIA C7 processor, it runs on Windows XPE, Windows CE or Linux. As an option, ISIA can be configured in PC-mode.

### Communicating

The cart can be completely controlled from a remote location. It's equipped with an 802-11 B-compatible WiFi card and a waterproof RJ45 Ethernet plug. Its large, light reflection screen provides quality reading (x-rays, pharmacy sheets, etc...).

### Autonomy

Two 12 V Gel batteries allow it to run for 12 continuous hours: a dedicated electronic card manages recharging to optimise their lifespan. An energy gauge always informs you of the remaining available time. VOYAGER can also be used while it's being recharged.

### Secured

Since it holds all of its organs in an integrated manner, VOYAGER is totally safe from any deterioration or part losses. It eliminates the daily handling involved with launching or putting away PC or keyboard-type organs.

### Confidential

Medical data have a personal and confidential character. VOYAGER can accommodate the RFID antenna of the Blue Loc identification system (optional) into its keyboard. It can also be equipped with a GEMPLUS-type card reader.

## Waterproof, integrated, cleanable

*100% waterproof, VOYAGER withstands hot, humid and dusty environments. Its smooth surfaces limit contamination and facilitate disinfection.*

### IP65-waterproof

ISIA is completely IP65-waterproof and it withstands sprays and aspersions.

- Front side : protected by a slab of tempered-glass. Touch-sensitive launch.
- Rear side : IP68-waterproof BULGIN connections
- Waterproof casing, without fan or inlets.

### Unalterable

Designed with the assistance of CLIN's (Committee for the Fight against Nosocomial Infections) hygiene managers, the unalterable tempered-glass keyboard withstands all disinfectants and chemical products. Instant locking. Fluid and light data entry. Integrated mouse.

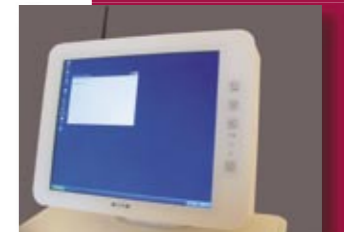

### Clean

The TACTYS and ISIA keyboards are smooth and touch-sensitive. Disinfection can be done in one movement after each entry. The wires are guided internally for optimal hygiene. VOYAGER's smooth surfaces facilitate disinfection.

### Freedom

Adjustable screen, 125 diam. polyamide casters with front brakes, side handles. With its optimised batteries, its protected screen, its unalterable keyboard, VOYAGER is very handy and suited for collective usage.

Enjoy ease and safety when consulting and entering patient data. Always ready to use, compact, handy, very autonomous, VOYAGER allows you to move from room to room, or to computerise the surgical unit, the casualty department, the laboratory... with permanent access to central server applications.

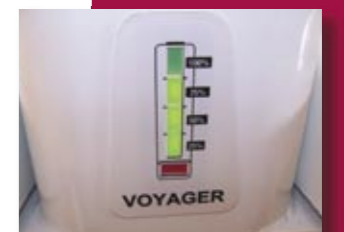

ISIA thin client/terminal screen

IP68 rear connections

Waterproof tempered-glass keyboard

Residual energy gauge
