

Smooth, clean, autonomous

THE WIRELESS TOUCH-SENSITIVE KEYBOARD

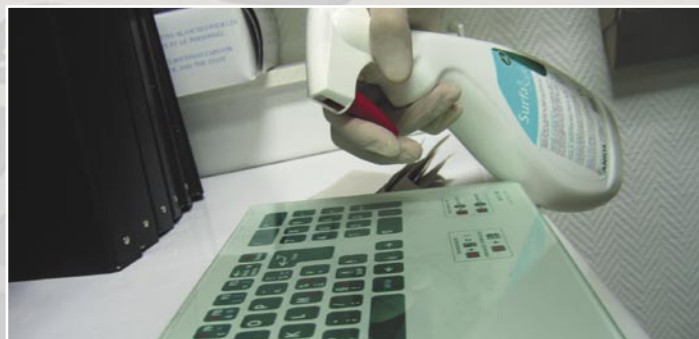

TW907

TACTYS invents the wireless touch-sensitive keyboard to better meet the specific needs of environments where hygiene is essential: hospitals, laboratories, pharmacies, dentist offices, food processing industry...

The latest in our line of tempered-glass touch-sensitive keyboards, reliable, comfortable, and impervious to chemicals, the TW907 functions with Zigbee technology (industrial version of Bluetooth). It allows for a great freedom of use and maximal hygiene, with:

- **An operating range greater than 20 meters.** Its antenna connects to the computer's USB port: the radio transmission passes through walls, which allows for remote operation of the central unit from another room.

- **A real autonomy for 20 hours of continuous data entry**

When the batteries need to be recharged, a red light blinks in the pilot zone: the keyboard has enough active energy for four hours of use.

Zone pilote autonomie

- **More than 30 hours of autonomy in sleep mode.**

In order to save energy, the keyboard goes on sleep mode after a few seconds on standby. This is indicated with a green light. To reactivate it, simply touch the pilot zone, and the keyboard is immediately operational.

- **Recharges in less than 4 hours with two options:**

- plugged in via a charger like a mobile phone
- or by placing it on its charging plate (ref. PT907) that recharges the batteries by magnetic induction with no need to plug it in: this is particularly suited to services equipped with several keyboards.

Touch-sensitive technology in the service of hygiene

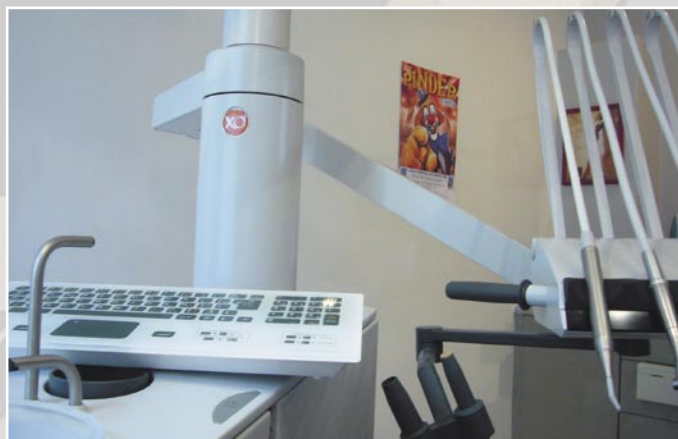

The pluses that make for the success of TACTYS keyboards :

- *Immediately operational*
- *Comfort and fluidity of keystrokes, with no pressure required*
- *Reliability of the capacitive effect technology*
- *Tempered glass, impervious to all disinfectants*
- *IP 65 waterproofing standard*
- *Can be used with gloves*
- *Beep signal when typing*
- *Keyboard lock for cleaning*

Specifications :

- «0 newtons» touch-sensitive keyboard: no pressure required, the lightest touch is enough
- Data entry surface in perfectly smooth 6mm-thick tempered glass
- Screen-printing on the back of the glass, visible but protected
- 0mm-movement required, static system
- Guaranteed IP 65 waterproof
- Can be used with gloves
- Impervious to all disinfectants
- Plug and play Wireless connection by Zigbee (industrial version of Bluetooth)
- Possibility for remote operation of the central unit at a distance of more than 20 meters, even behind a wall
- Active data entry autonomy: 20 hours
- Sleep-mode autonomy: more than 30 days
- Compatible Windows and Linux
- Windows key
- Keyboard locking function for cleaning
- Adjustable beep
- Compliant with European standards: 100 % ROHS, CEM certified by IRSEEM laboratories
- Cover in polycarbonate with access hatch
- Dimensions 419mm x 188mm x 47mm

All our keyboards are covered by a three-year in-shop warranty

Warranty valid for normal use and after consulting our after-sales service:
info@tactys.com or +33 (0)1 46 31 16 21.

The warranty does not cover damages for inappropriate use, broken glass, or battery replacement (for standard use, battery life exceeds two years).
