

SLIM 811/823 PCB

PCB of a touch keyboard for integration behind various flat surfaces

- Dimensions 420 x 129 mm
- 96 keys including Num Pad and Touch Pad
- Pre-applied full-surface adhesive 3M 365 MP tape
- Design layout as vector file available
- Mounting instructions available
- Water and dust proof up to IP69k
- Resistant to all disinfectants
- Lock function: Locks the keyboard during cleaning
- Taptop function enables smooth and comfortable typing
- High resistant tempered glass
- Touch typing without pressure
- Adjustable sensitivity
- Adjustable acoustic signal
- 1.8 meter USB cable
- PC/Mac compatible
- Compatible with all common OS
- Complies to European standards
- CE-certified
- 2 years warranty

Create your own keyboard surfaces!

PCB can be combined with all flat, non-metallic and rigid surfaces like wood, acrylic stone (Corian), glass, PMMA, stone or plastic. The material thickness should be 3 mm.

- Easy to integrate
- Pre-applied adhesive tape
- Functional diversity
- Completely disinfectable
- Useful for many areas of application
- Excellent price/performance ratio
- Reliable technology
- Purchase from one piece
- Fast delivery time
- Private label / OEM
- Individual adjustments
- Customised development
- High quality level
